Process and Methodology

Our Process involves 3 major steps:

1. Application Process
2. Scholarship Process
3. Visa Assistance

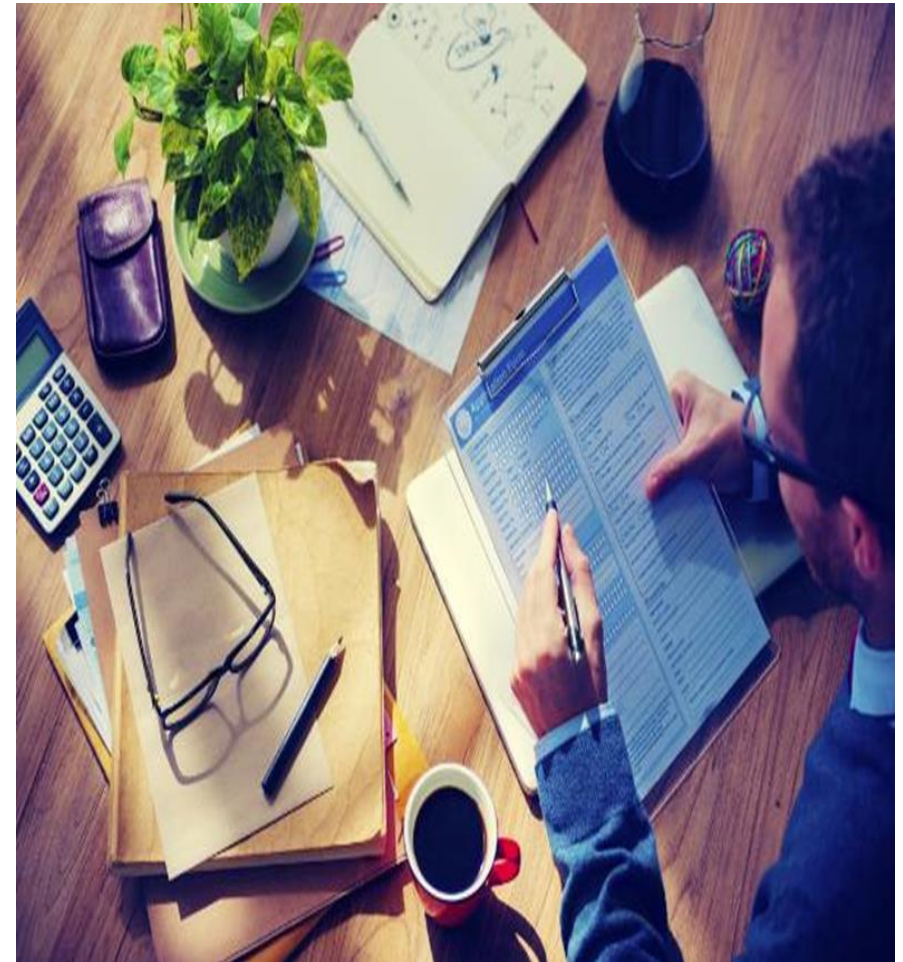

Application Process

We start with the application process initially, wherein we apply to maximum 6 Italian Universities as per students courses and universities preferences.

The next step would be receiving the Admit Offers from the applied Universities post which the student finalizes the University.

The next step will be scholarship, which is explained in the next slide.

Scholarship Process

Scholarship is given by the regional authorities of Italy not by the Universities.

This process involves – Apostille, Translation, Scholarship Application & International courier.

Scholarship is based on the low financial income of student's parents, not on the academic documents.

Once the students receives the 100% scholarship approval from Italian regional authority, we proceed with the concluded process as explained below.

Visa Assistance

This process has two major steps.

First is pre- enrollment, wherein it may be done online or the student needs to interact with the Visa Officer along with the required documents.

In the second step the student drops the passport along with all the original financial documents. Global Gateways experts will guide & assist partner for their student's visa application and documents submission.
